

Assignment 5

```
#include <iostream>
#include <string>
using namespace std;

class student {
public:
    string name;
    string course;
    int rno;

    void display() {
        cout << "Name:" << name << endl;
        cout << "Course:" << course << endl;
        cout << "Rno:" << rno << endl;
    }

    student(string name, string course, int rno) {
        this->name = name;
        this->course = course;
        this->rno = rno;
    }
};

int main() {
    student s1("Riya", "AI ML", 49);
    s1.display();
    return 0;
}
```
