

# Assignment 6

---

```
#include <iostream>
using namespace std;

class employee
{
public:
    int eid;
    string name;

    employee(int eid, string name)
    {
        this->eid = eid;
        this->name = name;
        cout << "Employee record created!!!!" << endl;
    }

    ~employee()
    {
        cout << "Employee record deleted!!!!" << endl;
    }

    void display()
    {
        cout << "EMPLOYEE ID:" << eid << endl;
        cout << "NAME:" << name << endl;
    }
};

int main()
{
    employee e1(567, "Priya");
    e1.display();
    return 0;
}
```
